Edison natural gas pipeline explosion

THINK AGAIN.

EXPLOSIONS.

If there's an explosion, everyone within ½ mile radius of the pipeline is in danger.

LEAKS.

The recent massive gas leak in Porter Ranch, CA highlights the risks of harmful methane leaks.

CUTTING CORNERS.

PennEast plans to use a thinner pipe that does not meet NJ standards, increasing the risk of a rupture or explosion.

HEALTH RISKS.

Pipelines can contaminate the air we breathe and the water we drink.
