

NEW JERSEY'S UTILITY WATCHDOG SAYS PENNEAST PIPELINE WOULD BE "UNFAIR TO CONSUMERS."

**Attention New Jersey utility
customers and property taxpayers:**

**If PennEast is built, you would be
forced to pay for a pipeline that
*isn't even needed!***

**"PennEast has failed to demonstrate that the
Project is in fact 'needed.' Moreover, the terms
under which the Project has been proposed are
unduly generous to PennEast."**

— New Jersey Rate Counsel

COSTS of the pipeline:

-  Reduced property values
-  Arsenic contamination of drinking water
-  Damage to wells and streams
-  Private property seized by private
companies through eminent domain
-  Damage to open space and farmland
preserved by tax dollars

**"If your well is dry or poisoned and your property
is worthless, it won't matter how much PennEast is
paying in taxes."**

— Richard Dodds, Committeeman and
former Mayor, Kingwood Township

**"The proposed pipeline would force our town to
incur \$3 million in incremental affordable housing
costs. Worst of all, NJ ratepayers would pay a
higher price for natural gas if this pipeline is built.
We do not need and do not want this pipeline."**

— Kevin Kuchinski, Mayor, Hopewell Township

**"West Amwell has spent millions of dollars to
preserve close to half of the township's land.
The paltry amount that PennEast would pay the
township for five years is dwarfed by the potential
many millions that this unneeded pipeline would
cost the township and its residents."**

— Zach Rich, Mayor, West Amwell

**Tell the owners of PennEast – PSEG, New Jersey Resources,
and South Jersey Industries – to STOP THE PIPELINE.**
