QUESTIONNAIRE ...................................................................
I. Executive Summary

About this study

Fairleigh Dickinson University’s PublicMind conducted a telephone survey of randomly selected registered voters in New Jersey on behalf of and commissioned by ReThink Energy NJ. The study’s main objective was to measure the awareness of, and attitudes toward, various energy sources in New Jersey. In addition, the study measured awareness and perceptions of proposed natural gas pipelines in the state.

The poll was conducted by landline and cellular telephone among a random sample of 704 registered New Jersey voters. Results have a margin of sampling error of +/- 3.6 percentage points, including the design effect. The total combined sample was mathematically weighted to match known demographics of age, sex, race, and education. 415 (51%) interviews were conducted on landlines and 289 (41%) were conducted on cellular telephones.

All surveys were completed between September 27 and October 7, 2016 and averaged just under 10 minutes in length. The results are summarized below. Where feasible, results from this year’s study will be contrasted with those from last year’s study.

Once again, registered voters in this study are very supportive of renewable energy initiatives, and support the state moving forward more rapidly than it is currently. As was observed last year, support for renewable energy is strong among all demographic groups, especially women, younger respondents, and Democrats. These demographic differences are consistent with the general trend in public opinion on environmental issues. Overall, more believe that solar (44%) is the most important energy source to New Jersey's future. This was true across all demographics and is consistent with the results from last year’s study.

Overall 87 percent believe investing in renewable energy is very or somewhat important to the overall health of New Jersey.

Given a choice of two opposing statements, two-thirds (61%) believe pipelines threaten New Jersey, while only one third (32%) believe they help, virtually unchanged from the last study.

Residents understand that solar and wind (94% and 93%) are “clean” sources of energy. However, there continues to be confusion regarding whether natural gas is “clean”, as 56 percent believe it is. This year fewer (31%) view nuclear energy as clean than in the past.
When asked which term they viewed most favorably, an equal percent chose “clean” (38%) as chose “renewable” (37%). “Green” was the once again the least popular choice (17%).

Seventy-one percent (71%) say it is more important for the state to invest in clean energy sources than in fossil fuels through construction of additional pipelines (20%).

Overall, 3 in 4 (75%) favor New Jersey’s next Governor setting higher goals of sourcing 30 percent of the state’s energy from renewable sources by 2020 and 50 percent by 2030. A majority (68%) favor reaching 80 percent renewable energy in the state by 2050.

The majority (69%) are ‘very’ or ‘somewhat’ concerned with climate change, and about two-thirds (63%) believe that the rate at which the state is developing and adopting renewable energy is too slow.

Half indicate they would be more likely to support a political candidate if they supported moving to clean energy sources, and women and Democrats hold an even stronger stance on this position.

The majority (74%) favor the development of off-shore wind energy off the coast of New Jersey.

More than half (58%) believe changes in climate is due to human intervention, while only a third (35%) say it is due to natural patterns.

Although most have heard just a little or nothing about the development of pipelines (60%), more than half (63%) express concern with proposed pipelines. Both measures are consistent with the 2015 study.

When asked about a variety of potential risks linked to pipeline development in the state, the vast majority of respondents say they would be “very” or “somewhat concerned” with each of the below risks. Across all instances, the level of concern was consistent with the 2015 study.

II. Detailed Results –

1. *First, how closely do you follow news about the various ways that people in NJ power their homes and businesses?*

Overall, about 3 in 5 (62%) report following news about energy sources, slightly higher than last year (59%). Women (42%) are more likely than men (34%) to not follow it closely. Those aged 18-34 (58%) are the least likely of their cohorts to follow closely.

2. Which source do you think is most important to New Jersey’s energy future?

A plurality (44%) say solar is the most important to New Jersey’s energy future, which holds true across all demographics.

3. **Among the following terms, which do you view most favorably?**

Overall, “clean energy” (38%) and “renewable energy” (37%) are equally cited as the most favorable terms, whereas only 17 percent favor “green energy”. More women (42%) than men (35%) prefer “clean energy”, while men (42%) are more likely than women (31%) to prefer “renewable energy”. Those aged 18-34 (41%) and those from the Northwest (46%) favor the term “renewable”.

4. Which of the following do you believe are considered clean energy sources?

A majority believe solar (94%) and wind (93%) are clean energy sources. More than half (56%) think that natural gas is a clean energy source, with a third who identify nuclear (31%). Fewer this year than last say that oil (10% vs. 17%) or coal (6% vs. 13%) are clean. More men than women believe natural gas (62% vs. 51%) and nuclear (46% vs. 17%) are clean.

5. How important do you believe investing in renewable energy sources, like wind and solar, is to the overall health of the state of New Jersey?

Overall, 87 percent believe investing in renewable energy is very or somewhat important. Slightly more women than men (91% vs. 84%), more in the 18-34 (91%) age cohort than in the 60+ (84%), and more Democrats (96%) than Republicans (83%) or Independents (82%) believe it to be important.

Chart 5
6. *In order to meet New Jersey's energy needs, do you believe the state should invest more in renewable energy sources, like wind and solar, or more in fossil fuels, like oil and natural gas, through the construction of additional pipelines?*

Overall, 4 in 5 (71%) believe the state should invest more in clean energy sources than in fossil fuels. While differences are seen across all measured demographics, renewable energy is overwhelmingly the favored choice.

7. **How do you rate the pace at which our state is developing and adopting renewable alternatives?**

About 3 in 5 (63%) continue to say New Jersey is moving too slowly in developing clean energy alternatives, consistent with last year. Women (69%) are more likely than men (58%) to express this sentiment.

8. When thinking about elected officials, does their support for moving from fossil fuels to renewable energy like solar or wind make you more likely or less likely to support them, or does their support for renewable energy make no difference?

Overall, half (50%) are more likely to support an elected official who supports renewable energy development, with more women (56%) than men (44%) feeling this way.

9a. As you may or may not know, New York’s Governor Cuomo has set a goal of 30% renewable energy by 2020 and 50% by 2030; both targets are above New Jersey’s current goals. Would you favor or oppose New Jersey’s next governor setting similar goals?

Overall, 75 percent favor setting a goal of having 30 percent of New Jersey’s energy coming from clean sources by 2020 and half by 2030. Far more women (83%) than men (65%) and more Democrats (92%) than Republicans (66%) or Independents (63%) support the measure. Southern residents are the least likely to support a higher goal (70%), and residents in Mercer/Hunterdon county are the most likely to support it (86%).

Chart 9
9b. Would you favor or oppose New Jersey setting a higher goal of 80% of energy from these sources by 2050?

Similarly, most (68%) favor a bill requiring 80 percent of New Jersey’s energy to come from renewable energy sources by 2050. The demographic differences virtually mirror those in the 2020 goal question.

11. Do you favor or oppose the development of off-shore wind energy off the coast of New Jersey?

Overall, three quarters (74%) favor the development of off-shore wind energy. This support is widespread, with no significant differences across any measured demographic at the combined strongly favor/favor level.

12. Some people say the Earth is getting warmer because of human activity, while others say it’s mostly due to natural patterns in the earth’s environment. Which is closer to your view?

Overall, three in five (58%) believe human activity is impacting the earth’s climate. Women (64%) are more likely to attribute this change to humans than are men (52%). Democrats (82%) are more likely to cite human activity than are Independents (49%) or Republicans (37%).

Urban Core: Essex, Hudson, Middlesex, and Union counties
PennEast: Hunterdon, and Mercer counties

South: Burlington, Camden, Cumberland, Gloucester, and Salem counties
Coast: Atlantic, Cape May, Monmouth, and Ocean counties
13. How much have you read or heard about the construction of new gas pipelines in the state?

Most have heard just a little or nothing about the pipelines (60%). Women (67%) are more likely than men (54%) to have heard just a little or nothing. Those from the proposed PennEast pipeline counties of Hunterdon and Mercer (74%) and those 60+ (50%) are more likely than their cohorts to have heard ‘a lot’ or ‘some’ about the new pipelines.

14. How concerned are you, if at all, about the potential impacts of these pipelines to New Jersey?

When asked a general question regarding concern about pipeline impact in New Jersey, 3 in 5 (63%) said they were “somewhat” or “very” concerned. Once again, more women (73%) than men (52%), and more Democrats (83%) than Republicans (47%) or Independents (53%) expressed concern.

15. Concern about the pipeline development to: SUMMARY

When asked how concerned they are regarding six specific potential issues with the proposed pipelines, data are strikingly similar across all measures. Only the concern for the delivery of gas from fracking outside the state rated significantly lower than the others, although there is still significant concern (69%). In virtually all instances, more women express concern than men, those 18-34 are the most concerned age demographic, and Democrats express more concern than Republicans or Independents. Charts 17 through 22 detail these responses.
15a. Concern about the pipeline development to: The risks to air and water quality

16. Which of the following statements best describes how you feel, even if neither is perfect?

When presented with two opposing statements regarding the proposed pipelines, the majority (61%) chose “pipelines threaten preserved lands, our water supplies, and public health and safety. New Jersey should instead adopt clean sources of energy like wind and solar that will benefit our environment and economy.” Only a third (32%) selected the option “pipelines are safe, create jobs and bring cheap and reliable natural gas that will benefit New Jersey businesses and consumers.” Significant differences are seen across virtually all measured demographics.

APPENDIX A

Questionnaire
Q1. How closely do you follow news about the various ways that people in New Jersey power their homes and businesses?
1. Very closely
2. Somewhat closely
3. Not at all closely
8. DK (vol)
9. Refused (vol)

Q2. Which source do you think is most important to New Jersey’s energy future? (Rotate, Read List, stop when respondent indicates a choice)
1. Solar
2. Wind
3. Natural gas
4. Oil
5. Nuclear
6. Coal
7. Other (vol) [specify]
8. DK (vol)
9. Refused (vol)

Q3. Among the following terms, which do you view most favorably? (Read and rotate first 3)
1. Clean Energy
2. Green Energy
3. Renewable Energy
4. There is no difference (Vol)
8. DK (Vol)
9. Refused (Vol)

Q4. Which of the following do you believe are clean energy sources? (Read List and rotate order) [Check all that apply]
1. Solar
2. Wind
3. Natural gas
4. Oil
5. Nuclear
6. Coal
Q5. How important, if at all, do you believe investing in renewable energy sources, like wind and solar, is to the overall health of New Jersey?
1. Very important
2. Somewhat important
3. Not very important
4. Not at all important
8. DK (vol)
9. Refused (vol)

Q6. In order to meet New Jersey’s energy needs, do you believe the state should invest more in renewable energy sources, like wind and solar, or more in fossil fuels, like oil and natural gas, through the construction of additional pipelines? Rotate choices
1. Renewable sources
2. Fossil fuels
8. DK (vol)
9. Refused (vol)

Q7. How do you rate the pace at which our state is developing and adopting renewable energy alternatives? Would you say it is...
1. Too slow
2. Too fast
3. Just right
8. DK (vol)
9. Refused (vol)

Q8. When thinking about elected officials, does their support for moving from fossil fuels to renewable energy like solar or wind make you [Rotate more or less likely] more likely or less likely to support them, or does their support for renewable energy make no difference?
1. More likely
2. Less likely
3. Makes no difference
8. DK (vol)
9. Refused (vol)

Q9a. As you may or may not know, New York’s Governor Cuomo has set a goal of 30% renewable energy by 2020 and 50% by 2030; both targets are above NJ’s current goals. Would you favor or oppose New Jersey’s next governor setting similar goals?
1. Favor
2. Strongly Favor
